INDUSTRY PROFILE

Colorado Urban Front Range

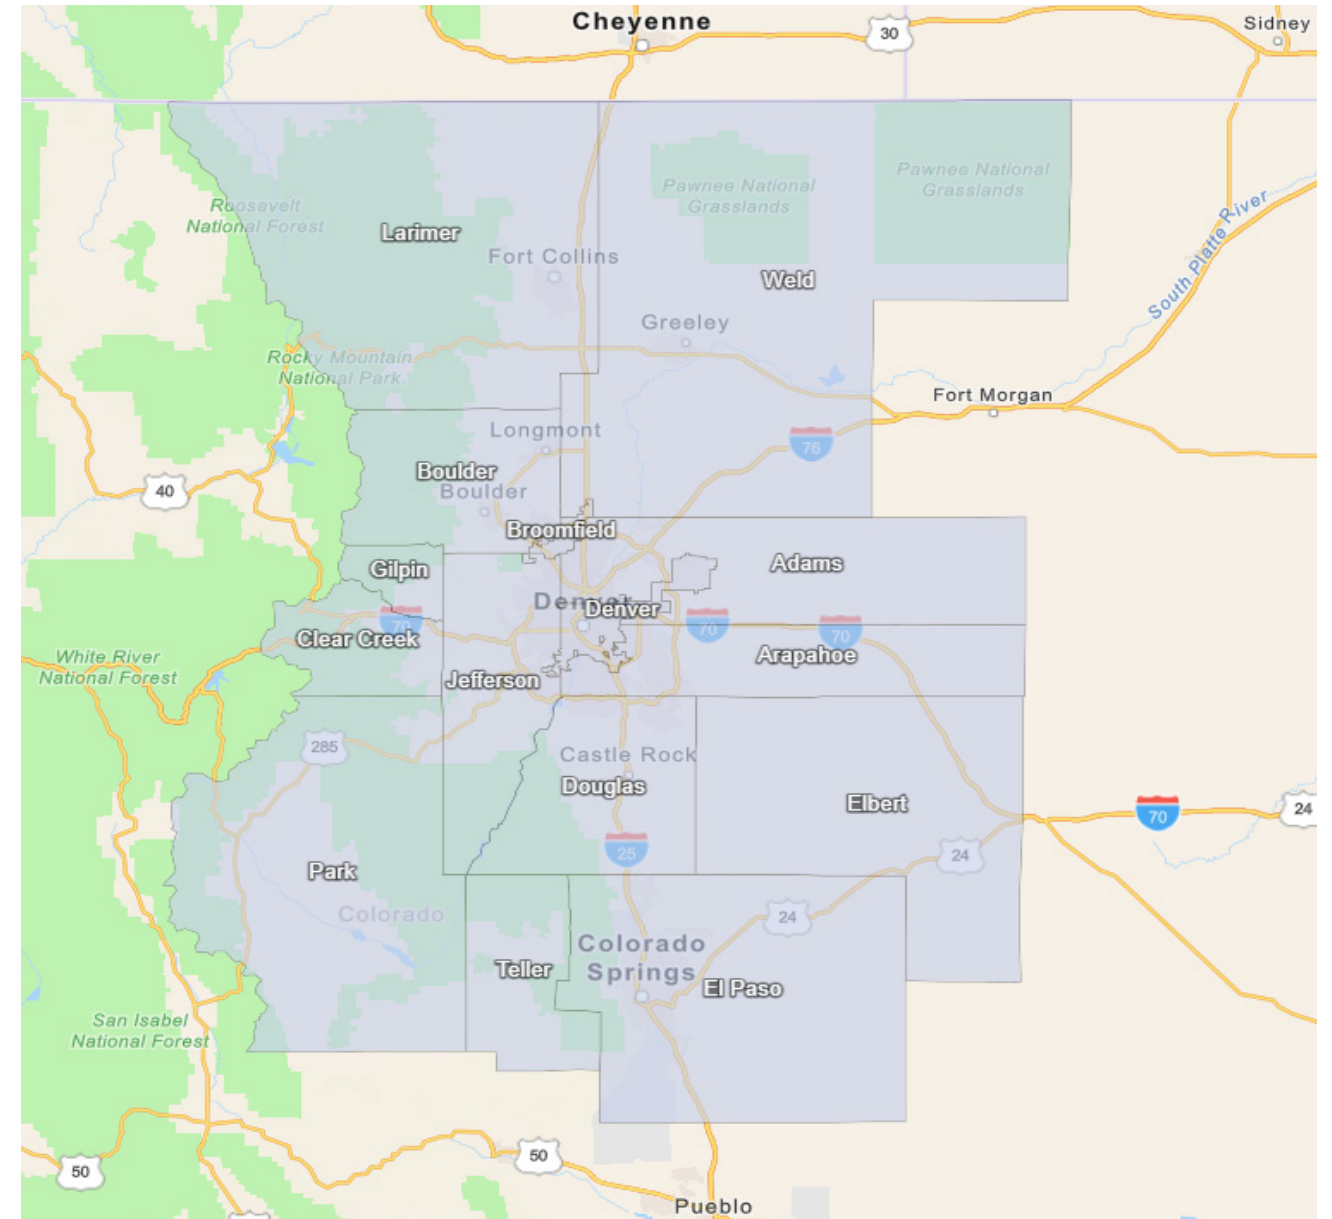

Arapahoe/Douglas
WORKFORCE BOARD
C O L O R A D O

Geographical Area

The geographical area for this industry profile includes the 15 counties that make up Colorado's Urban Front Range.

The geographic region includes the following metropolitan areas:

- Boulder
- Colorado Springs
- Denver-Aurora-Lakewood
- Fort Collins
- Greeley

In 2023, this 15 county region employed nearly 2.72 million people across all industries, and made up 84% of Colorado's total employment.

In 2023, the Gross Regional Product (GRP) for the Front Range region was \$422.9 billion, which made up 1.94% of the national GRP.

Lightcast defines GRP as the final market value of all goods and services in the region.

Healthcare

▲ **2.3%** From prior year

9.7%

**Total Jobs in CO
Urban Front Range**

The healthcare sector employs 249,128 people in 13,967 establishments. An 'establishment' is one facility in which people work. For example, a business in the sector may have several locations, and each one of those locations counts as an 'establishment.'

In 2023, the sector had \$42.6 billion in sales, and contributed \$26.2 billion to the region's GRP. Colorado's front range is home to a variety of national providers, including Centura, HCA, Kaiser Permanente, Children's Hospital, the Rocky Mountain Regional VA Medical Center and University of Colorado Health Sciences; the region offers high quality and affordable healthcare to businesses locating or expanding in the region.

Healthcare Sector

Employment concentration is also known as location quotient. Location quotient measures industry employment concentration in a given geography relative to the national average. For example, employment in hospitals (state government) is 4.14 times more concentrated than the national average for this industry. The North American Industry Classification System (NAICS) is used to categorize businesses and organizations based on their primary economic activities. It is used throughout the United States, Mexico, and Canada.

Ambulatory Health Care Services

NAICS
621

Numbers to Know

- 132,887 jobs
- 12,990 establishments
- 0.97 employment concentration
- \$21.6 billion in sales
- 8.1% change to 2028
- \$77,360 average wage
- \$14,805 average employer paid benefits

Hospitals

NAICS
622

Numbers to Know

- 46,872 jobs
- 119 establishments
- 0.55 employment concentration
- \$9.4 billion in sales
- 3.5% change to 2028
- \$81,788 average wage
- \$16,559 average employer paid benefits

Nursing & Residential Care Facilities

NAICS
623

Numbers to Know

- 33,803 jobs
- 800 establishments
- 0.68 employment concentration

Employment Concentration

Employment Concentration Map

Colorado Urban Front Range

The overall employment concentration in this sector is .87 times the national average, which suggests the region has a steady supply of skilled labor. Concentration also varies by county, with the heaviest sector employment concentrations in Larimer and Arapahoe counties.

Source: Lightcast

Sector Employment Concentration

Employment concentration in the sector is shown here within each of the 15 counties making up the region. Note that the current wages, salaries, and proprietor earnings, as well as the current employer-paid benefits are different within each county. This is because each county has a different mix of businesses operating within various industries in the sector. For example, the highest average wage per worker is in hospitals while the lowest is in nursing and residential care centers. Thus, a county that has a greater concentration of nursing homes will have a lower average wage per worker.

ADAMS

- Jobs - 28,254
- Employment Concentration - 0.91

Commute Map

Where Core Workforce Lives

Every industry has a group of occupations it needs to fulfil its mission. This is called a staffing pattern, and generally includes managers, business and finance people, sales and administrative support, computer and mathematical occupations. There is also a core set of occupations that are primarily responsible for producing the good or services that industry provides. In healthcare, this core set of occupations is made up of healthcare professional and healthcare support occupations. Examples of these occupations include registered nurses, nursing assistants and home health aides. This map shows where persons employed in these occupations live (orange areas) and where they work (blue areas).

Where Core Workforce Lives

Commute Patterns

This table shows the number of 'net commuters' in each of the 15 counties making up the region. For example, 16,478 people in these core healthcare jobs live in Douglas County, while there are 11,864 employed there. This means 4,615 more healthcare professionals live in Douglas County than work there. Note: the latest commuter data available is from 2023.

County	Net Commuters	Resident Workers	Jobs
Denver	17,809	32,062	49,871
Boulder	4,704	12,147	16,850
Arapahoe	2,042	34,442	36,484
Larimer	1,048	17,436	18,484
El Paso	908	36,593	37,501
Adams	13	22,064	22,078
Gilpin	(62)	190	128
Clear Creek	(196)	314	119
Park	(379)	515	137
Teller	(507)	1,100	593
Broomfield	(678)	3,694	3,015
Elbert	(889)	1,066	177
Douglas	(4,615)	16,478	11,864
Jefferson	(5,568)	28,642	23,074
Weld	(8,756)	16,460	7,704

Source: Lightcast

Demographics

Comparative Retirement Risk

The comparative retirement risk for the healthcare sector in the 15 county region is slightly lower than across all industries. Also note the significantly lower numbers in the 14-18, 19-21 and 22-24 age bands. This suggests fewer younger people entering the sector comparative to all industries.

Comparative Gender

Percent of Workforce

- Healthcare Industry
- All Industries

Men
42.6%
52.4%

Women
57.4%
47.6%

Comparative Racial Diversity

This bar chart shows the racial and ethnic diversity in the industry versus across all industries in the 15 county region. This is measured by a concept called 'total diversity,' which is the percent of racial or ethnic minorities employed in the sector versus the percent of racial and ethnic minorities employed across all industries. Healthcare is much more diverse than the overall average within the region, with overall diversity at only 33.3% of the sector's workforce, versus 30.6% across all industries.

Source: Lightcast

Telework and Automation Strategies

Remote Work Potential

16.9% Remote Work Capability for Sector

In a scarce labor market, a valid strategy for employers might be to review their staffing pattern and determine which positions, if any, can be employed remotely or on a hybrid work schedule. Approximately 16.9% of the workforce in healthcare has at least partial teleworking capacity.

Automation Index

88.8

Another valid strategy employers can use in today's scarce labor market is automation. The automation numbers presented in this profile are based on an automation index which was developed in 2013. While this is the best available data, it is likely that additional automation strategies are now available. Automation leverages the productive capacity of fewer workers to allow for higher output.

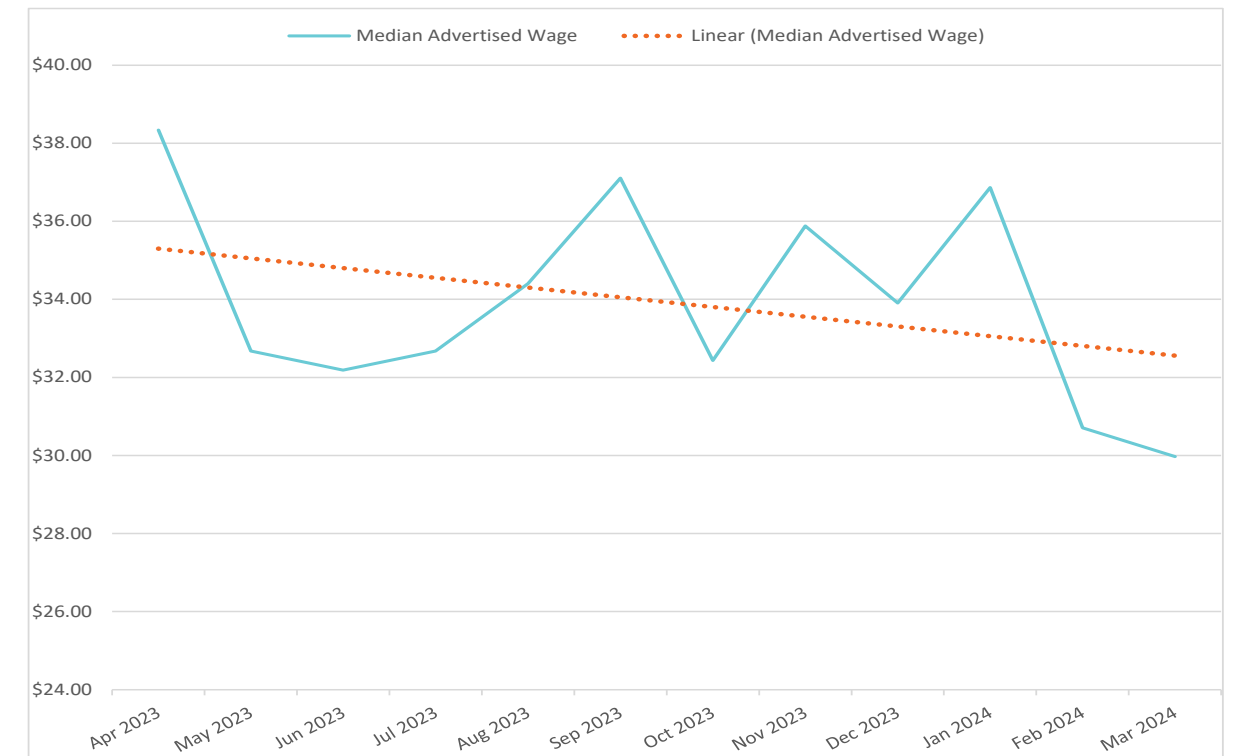

Source: Lightcast

Wages

Advertised Wage Trends

This line graph shows movement in advertised wages in jobs posted in the sector over the last year.

Competitive Wage Analysis

This table shows the top 20 occupations by percentage of total employment in the sector, as well as total employment across industries. For example, the healthcare sector employs 37,416 registered nurses but there are 47,105 employed across all industry sectors. This is important because the healthcare sector must compete with other sectors for critical talent, such as home health aides and nursing assistants. Average annual openings for each occupation is estimated according to known attrition (people leaving the occupation or retiring) as well as expected national and local growth in the occupation.

Median posted wage levels can be compared to estimated entry and experienced level wages, and the typical entry level education, as well as the typical on-the-job training (OJT) are shown to illustrate the potential for apprenticeships and OJT to supplement shortfalls in the traditional training pipeline.

The Standard Occupational Classification (SOC) system is used by Federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data.

Competitive Wage Analysis

SOC	Description	Jobs in Sector	% of Total Employment in Sector	Jobs Across all Industries	Average Annual Openings		Median Posted Wage	Entry Level Wage	Median Wage	Highly Experienced Level Wage	Typical On-the-Job Training	Typical Entry Level Education

Top Occupations

These figures use information from unique job postings across the sector to show the number of jobs posted in the 15 county region during the last year and median posted salary. It is also important when planning staffing strategy to look at hires, separations and turnover rate for each of the occupations, whether the occupation is apprenticeable or not, and the top skills demanded over the prior 12-month period.

Discover more about each occupation by simply clicking on the respective icon.
